EXPERIENCE

at HTML Academy Bootcamp (Sept 2022 - Present)

JavaScript. Professional Development of Web Interfaces

(Feb 2023 - Apr 2023)

Project [Kekstagram](#)

- Using the provided markup I made the website interactive with JavaScript; rendering photos, comments, likes based on the data retrieved from the server;
- Developed modular code structure and utilized templates for improved code organization;
- Worked with server data in JSON format, handling events, filtering data and manipulating DOM;
- Worked with external libraries such as PristineJS and noUISlider;
- Familiarized with event delegation, callbacks and promises.

Technologies: JavaScript, DOM, npm, Git, AJAX

HTML & CSS. Adaptive Website Coding and Automation

(Nov 2022 - Jan 2023)

Project [Mishka](#)

- Developed an adaptive website for three screens: mobile, tablet, and desktop, using Mobile first approach;
- Created responsive and flexible layouts;
- Applied BEM methodology and SASS for writing reusable and maintainable code;
- The website is built Pixel Perfect to the design;
- Utilized Gulp for automating repetitive tasks and streamlining the development workflow.
- Implemented image optimisation

Technologies: HTML, SASS, BEM, Responsive web design, Flexbox, Grid Layout, Git, npm, Figma, Gulp, JavaScript

HTML & CSS. Professional Website Coding

(Aug 2022 - Nov 2022)

Project [Sedona](#)

- Translated Figma layouts into a Pixel Perfect website using semantic HTML5 for precise visual representation;

Technologies: HTML, CSS, Figma, Flexbox, Grid Layout, Pixel Perfect
